# Laila Ragheb

UX Writer | Content Designer | Content Operations Specialist
+201063232483 | lailaragheb18@gmail.com | linkedin.com/in/laila-hammouda | Cairo, Egypt

## SUMMARY

Bilingual UX Writer (Arabic & English) with experience building and scaling content operations, governance frameworks, and UX content for digital products in fintech. Skilled in creating user-centered experiences through UX writing, content strategy, localization, and cross-functional collaboration.

## WORK EXPERIENCE

**Onebank, Egypt's first digital bank** | Maadi, Cairo

*Bilingual UX Writer / Content Moderator (AR & ENG)* | Aug 2024 - Present

- Crafted **UX copy for 20+ user journeys** across the mobile app and website, ensuring consistency with brand voice, readability and usability standards.
- Led and mentored a **content team** consisting of a UX Writer and a Content Moderator, overseeing content quality, alignment, and delivery across key initiatives.
- Designed and trained an **AI-powered tonality checker** that evaluates content against internal brand guidelines and the Lokalise content database, providing tone-match scoring, detailed content analysis, and recommendations to improve content quality and consistency.
- Built a **Figma plugin to streamline content and localization workflows**, enabling UX writers to sync Figma content with Lokalise and Figma variables, import and update multilingual content, manage content branches, and extract UI text—reducing repetitive manual work across localization workflows.
- Partnered with product, design, compliance, and engineering teams to **define content requirements, conduct content reviews, and ensure regulatory compliance** and launch readiness across customer journeys.
- Built a **launch-ready internal knowledge base comprising 350+ user tutorials** to support customer service operations and onboarding at scale.
- Established **foundational content standards**, including the organization's **tone of voice, brand glossary, and content guidelines, for Egypt's first digital bank.**
- Created and maintained **customer-facing FAQs** for the mobile app and website, improving self-service support and content consistency across channels.
- Conducted **multiple end-to-end content QA and testing cycles**, identifying and resolving content, localization, and usability issues prior to release.

**Mondia** | Remote

*Freelance UX Writer* | April 2026 - Present

- Created the content guidelines, tone of voice, and brand glossary for MoneyMore, a budgeting and personal finance mobile application.
- Wrote bilingual (Arabic & English) UX copy across 7 end-to-end user flows and 50+ unique screens per flow, ensuring consistency, clarity, and usability.
- Defined and standardized product terminology to establish a consistent customer experience across the application.
- Collaborated with stakeholders to translate product requirements into intuitive user experiences through clear, user-centered content.

**Tahaluf Al-Emarat Technical Solutions** | Remote

*AI Product Writer* | May 2023 - Aug 2024

- Created content for **15+ AI-powered products** and features across multiple customer segments.
- Produced a **wide range of content assets**, including product descriptions, blog posts, marketing materials, feature overviews, and white papers.
- Authored **white papers covering AI technologies**, use cases, and industry trends for technical and specialized audiences.
- Researched and translated **complex AI product capabilitie**s into clear, accessible content tailored to both technical and non-technical audiences.
- Collaborated with **3+ cross-functional teams**, including product managers, designers, and subject matter experts, to deliver accurate and user-focused content.

**VMware** | Cairo, Egypt

*Technical Support Engineer* | Sep 2021 - May 2023

- Diagnosed and resolved complex technical issues, including system outages, failed upgrades, and installation failures, through system log analysis and root cause investigation.
- Exceeded performance targets by maintaining a 93% average CSAT score per quarter (vs. 89% target) and an average case closure rate of 18.5 cases per week (vs. 13 target).
- Delivered technical workshops and training sessions to 25+ university students as part of VMware's University Relations program.

## EDUCATION

**The German University in Cairo** | Cairo, Egypt

*Business Informatics (GPA: 3.51)*

## SKILLS

**Content:** UX Writing, Content Design, Content Strategy, Content Governance, Content Operations, Localization, Technical Writing, Knowledge Management, Content QA & Testing, Tone of Voice Development, AI Content Strategy, Prompt Engineering
**Tools:** Figma, Lokalise, Sitecore, Jira, Confluence, CRM Platforms
**Languages:** Arabic (Native), English (Fluent)

## PROJECT EXPERIENCE

**AI-Powered Tonality Checker | onebank**

- Designed an AI-powered tool that evaluates content against brand guidelines and the Lokalise database, providing tone-match scoring and content recommendations.
- Reduced subjectivity in content reviews, improved consistency across writers, and streamlined the validation of content against the organization's tone of voice.

**Content design system | onebank**

- Built onebank’s bilingual (Arabic and English) content design system from the ground up, covering brand voice and tone, editorial standards, content foundations, and reusable component-level writing guidelines.
- Established a content governance framework defining ownership, workflows, review and approval processes, and quality checklists to improve content consistency, scalability, and regulatory compliance across digital products.
